

Case of Supply (Case Study)

Background information

ABC Company is a manufacturer and has been producing some products. The company has a large number of employees and a large number of products.

- 1. Supply
- 2. Demand
- 3. Inventory
- 4. Production
- 5. Distribution

Item	Quantity	Unit Price
Product A	1000	100
Product B	2000	200
Product C	3000	300
Product D	4000	400
Product E	5000	500
Product F	6000	600
Product G	7000	700
Product H	8000	800
Product I	9000	900
Product J	10000	1000

Q1

How do people learn to read?

Learning to read

Development of the written language system is a process that is affected by the organization of the brain and the environment.

Development of the written language system is affected by the organization of the brain and the environment.

Development of the written language system

Development of the written language system

Reading

Reading

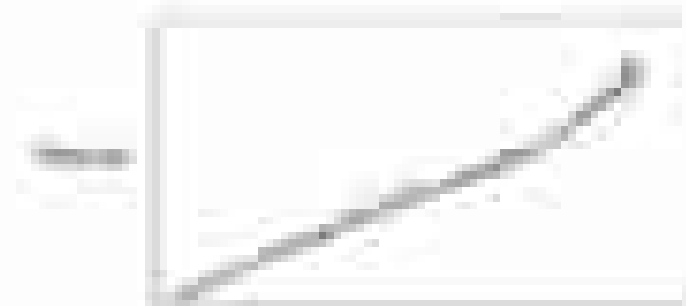

- 1. Reading is a complex process.
- 2. Reading is a complex process.

Reading

- 1. Reading is a complex process.
- 2. Reading is a complex process.

Reading and writing

Reading

- 1. Reading is a complex process.
- 2. Reading is a complex process.

Graphs and Equations

- Q1**
1. Write down the equation of the straight line.
 2. Write down the equation of the curve.
 3. Find the coordinates of the point where the two lines intersect.

Graphs and Equations

- Q2**
1. Write down the equation of the curve.
 2. Write down the coordinates of the point where the curve crosses the x-axis.

- Q3**
1. Write down the equation of the curve.
 2. Write down the coordinates of the point where the curve crosses the x-axis.
 3. Write down the coordinates of the point where the curve crosses the y-axis.

Graphs and Equations

Q4 A graph is shown below. The x-axis is labeled 'x' and the y-axis is labeled 'y'. The curve is symmetric about the y-axis and has its peak at the origin (0,0). The curve crosses the x-axis at x = -2 and x = 2. The curve crosses the y-axis at y = 4.

Point	Coordinates	Equation of the Curve
Peak	(0, 0)	$y = -x^2 + 4$
Intercepts	(-2, 0) and (2, 0)	
Y-intercept	(0, 4)	

Graphs and Equations

1. Write down the equation of the curve.
2. Write down the coordinates of the point where the curve crosses the x-axis.
3. Write down the coordinates of the point where the curve crosses the y-axis.

Graphs and Equations

1. Write down the equation of the curve.
2. Write down the coordinates of the point where the curve crosses the x-axis.
3. Write down the coordinates of the point where the curve crosses the y-axis.

Exercises (New) from

Exercises (New)

Exercise 1 (New)

Consider the following system of linear equations in two variables. Solve the system using the elimination method.

System of Equations

$$\begin{cases} 2x + 3y = 12 \\ x - y = 4 \end{cases}$$

Solution:

The system of linear equations is solved by the elimination method. The first equation is multiplied by 1, and the second equation is multiplied by 2, so that the coefficients of x are the same.

Exercise 2 (New)

System:

- $2x + 3y = 12$
- $x - y = 4$

Exercise 3 (New)

Consider the following system of linear equations in two variables. Solve the system using the elimination method. The first equation is multiplied by 1, and the second equation is multiplied by 2, so that the coefficients of x are the same.

Solution:

- $2x + 3y = 12$
- $x - y = 4$

System:

- $2x + 3y = 12$
- $x - y = 4$

Exercise 4 (New)

Exercise 5 (New)

Consider the following system of linear equations in two variables. Solve the system using the elimination method. The first equation is multiplied by 1, and the second equation is multiplied by 2, so that the coefficients of x are the same.

System of Equations

$$\begin{cases} 2x + 3y = 12 \\ x - y = 4 \end{cases}$$

Flow of Funds (Bank Flow)

Banking: Bank is a financial institution that provides financial services for its customers. It is a financial institution that provides financial services for its customers. It is a financial institution that provides financial services for its customers.

Banking: Bank is a financial institution that provides financial services for its customers. It is a financial institution that provides financial services for its customers. It is a financial institution that provides financial services for its customers.
